What is Narcan?

Narcan (naloxone) is an opiate antidote. Opioids include heroin and prescription pain pills such as oxycodone, codeine, and morphine. Narcan is a prescription medicine that blocks the effects of opioids and reverses an overdose.

No need to pre-register, but if you have questions, contact Marisol Gonzalez at 847-870-2695 or email at gonzalezm@cityrm.org
